

Security Settings for Ascribe™ with Internet Explorer

1. Open Internet Explorer and select **Tools** and then **Internet Options**.
2. Click on the **Security** Tab, then the **Trusted Sites** icon and then the **Sites** button.
3. Add ***.languagelogic.net** to the list of Trusted Sites (you will need to unselect the "**Require server verification (https:) for all sites in this zone**" check box).

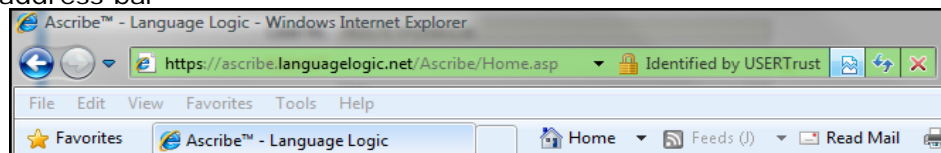

4. Click **Close**
5. Click on the "**Custom Level**" button (while still having the **Trusted Sites** icon selected).
6. Enable all items under the heading **Active X Controls and Plugins** (there should be about 10 of them)

7. Click **OK**, and then **OK** again to close out of the **Internet Options** box.
8. Close Internet Explorer and then open a new session of it.
9. Now log on to:
 - ascribe.languagelogic.net/ascribe

10. Once you are logged in you should see two icons.

- The first icon should be a little **yellow padlock** to the right of the address bar

- The second icon should be a **green checkmark** with the words "**Trusted Sites**" next to it, down in the Status Bar (just above the time on your PC).
